Work Experience

Shanghai Duoke Network Technology　　　　**Front End Engineer**
2024.1-2024.8

- As a member of the front-end development team, I developed a SaaS e-commerce platform for the company. The project has more than 100,000 active users per day.
- Choose Vue.js3 as the front-end framework and Ant-design as the UI library.
- Cooperate with UI designers and backend engineers to realize page writing and interaction.
- Extract common components and encapsulate them into independent component libraries for easy reuse.
- Performance optimization: Optimize page performance through lazy loading, image compression, etc.

Isof tstone　　　　**Front End Engineer**　　　　**2017.1-2023.9**

- Use vue3 and Ant-Design for component development.
- Develop responsive official website.
- Develop PC management backend page.
- Develop mobile H5 and WeChat applet page
- Work with UI designers and backend developers to write pages and interface docking. Complete page implementation with high quality.

- Use Git for version control and iteration,separate front-end and back-end architecture, and improve reuse and maintainability through componentization.

Skills

- Familiar with front-end technologies such as html, css, js, bootstarp, jquery, etc.
- Familiar with vue.js framework;
- Familiar with ElementUI, TdesignUI, antdesignUI framework;
- Familiar with Git and Svn version control;
- Familiar with MySQL database operations and using PHP to optimize MySQL;
- Familiar with thinkPHP and laravel framework;
- Familiar with Redis database;
- Familiar with RabbitMQ message middleware;
